

Your data are very valuable: The **security of your data is of utmost importance** to us.

That's why we use **state-of-the-art encryption systems** for all of your communications with our servers - POP3, IMAP, mobile sync, Webmail. All encrypted to provide the highest possible security.

We do what only a handful of other providers do: We offer **only encrypted connections** for your security!

And: We will never give your personal data to other companies. That's a promise!

Our servers are located in **high security data centers** with bank-level security, featuring **24/7 access control**, fire prevention and extinction, redundant power supplies, generators, redundant connections, etc..
