Installing interWaysMAIL for Apple Mac OS/X 10.4 and higher is fast and easy: **Now: Compatible with Mavericks!**

- **IMPORTANT: Please make a complete backup of all your data** before continuing by exporting all your data:

- Open iCal.
- Choose the first calendar in the calendar (folder) list on the left and click on it (highlighted blue).
- Click (on top of screen in the menu bar) "File" --> "Export".
-

- Click "Export" after choosing the folder you wish to save the file in (best to backup to external drives/media)...
- Repeat the above steps for all local calendars (if multiple) you wish to use.
-

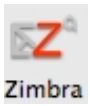

- Open Address Book, click on "File" --> Export" --> "Adress Book Archive".
- Click on "Save" after choosing the folder you wish to save the file in (best to backup to external drives/media)...

- **Mac OS 10.5 & 10.6 only** (10.7 Lion and newer: instructions further down this page): Download the Apple Mac / iSync Connector file from our Support area ==>Downloads

.

- **Close** the **System Preferences** window, should it be open!
- Double-Click the file and follow the installation procedure.
- Open System Settings (grey gears symbol) and click on Zimbra

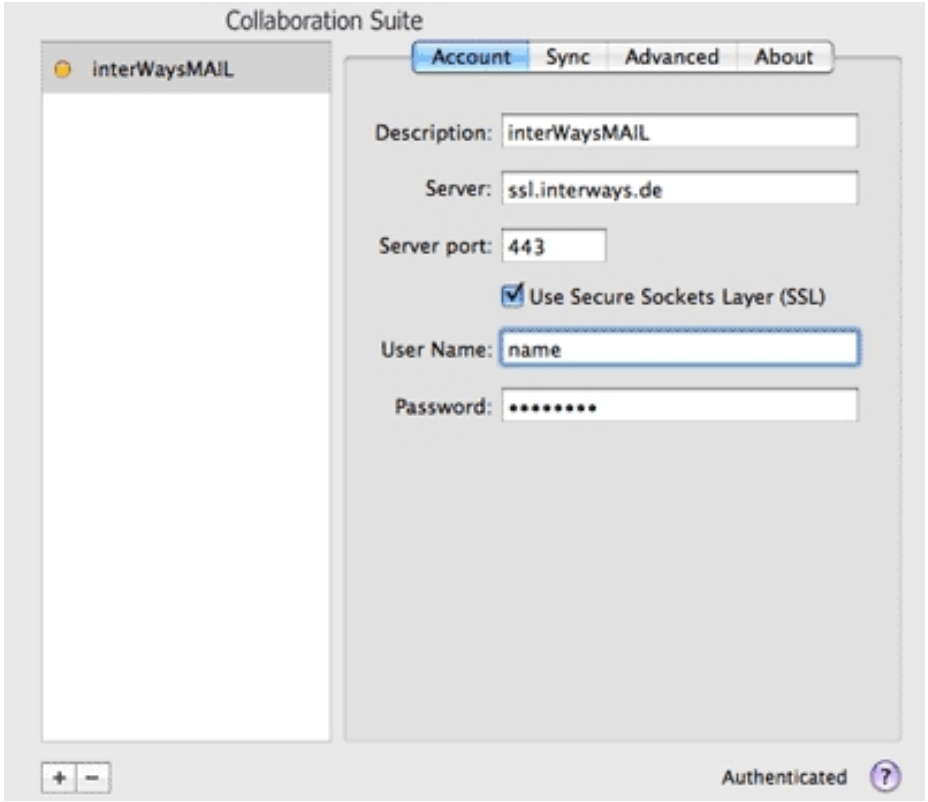

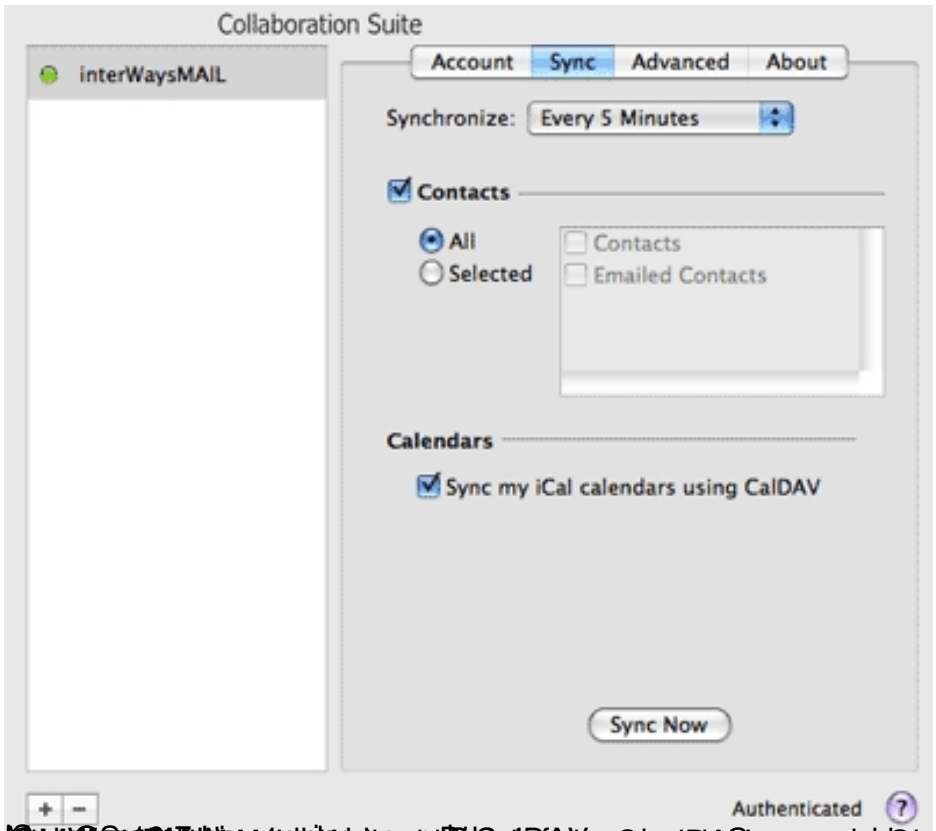

, should the Zimbra window not have opened automatically.
- Under "Account", enter the following:
- Account: your description
- Server: ssl.interways.de
- Server Port: 443
- User Secure Sockets Layer: On
- User Name: Your interWaysMAIL Email Address

- Password: Your Password

- Under "Sync" settings you can adapt the settings or leave the defaults. Please start the first sync by clicking "Sync Now".
- **Important: NEVER change the sync interval (at "Sync" --> "Synchronize") to less than 30 minutes! Leave it as it is or make it more than 30 minutes (best: Every Day).**
It must be at least 30 minutes
or more. Otherwise your account will get locked automatically by our system!

- Done!
